Amrit Verma

Intern @ UptimeAI | B.Tech @ NITW | HPAIR'25 Delegate @
University of Tokyo | RISC'25 @ IIT Bombay | Campus Delegate @
WMS | Computer Vision Enthusiast | Robotics Club @ NIT Warangal
Bengaluru, Karnataka, India

Summary

Hi, I'm Amrit, a B.Tech Chemical Engineering student at National Institute of Technology Warangal with a strong interest in Artificial Intelligence, Computer Vision, and Software Development. Currently, I work as an AI Implementation Engineer at UptimeAI, where I contribute to deploying AI-driven solutions for industrial applications. My interests primarily revolve around AI automation, Machine Learning, and Computer Vision. I enjoy building systems that combine multiple AI technologies into practical end-to-end solutions. Recently, I developed a fully automated YouTube content generation pipeline that handles the complete video publishing workflow — including script generation using LLMs, AI-based image/video generation, voice synthesis, caption generation, video assembly, and automated YouTube uploads. I have also participated in conferences such as HPAIR ACONF 2025 and RISC 2025, which expanded my perspective on innovation and technology. I'm always eager to learn, build, and contribute to impactful technology-driven solutions.

Experience

UptimeAI Inc.

AI Implementation Engineer

March 2026 - Present (3 months)

Bengaluru

Working as an AI Implementation Engineer Intern at UptimeAI, contributing to the deployment and configuration of AI-driven predictive maintenance and operational intelligence solutions for heavy industries such as power, oil & gas, and manufacturing. My work involves supporting model setup, sensor data validation, and onboarding plant data to help deliver accurate fault diagnosis and prescriptive insights for operations teams.

WeMakeScholars

Campus Delegate

December 2025 - February 2026 (3 months)

It is an organization funded & supported by the Ministry of IT, Govt. of India under the 'Digital India' Campaign. With a publication of over 25,000 scholarships, WeMakeScholars.com is the world's largest scholarship discovery and application platform.

As a Campus Delegate, I'm responsible to spread awareness about the HEST 2025 test.

Harvard Project for Asian and International Relations (HPAIR)

8 months

Delegate – HPAIR Conference

November 2025 - February 2026 (4 months)

Boston, Massachusetts, United States

Selected for the second time at HPAIR conference, but this time at Boston, Massachusetts, USA

HPAIR HCNOF'26

Delegate

July 2025 - November 2025 (5 months)

Tokyo, Japan

Selected as a delegate member in Harvard Project of Asian and International Relation (HPAIR) , representing my institute on international stage.

Innovatecloud Solutions

Summer Intern

May 2025 - June 2025 (2 months)

Bengaluru, Karnataka, India

Excited to kick off my summer internship at Innovatecloud Solutions as a Python Developer Intern!

Grateful for this opportunity to grow, learn, and contribute to real-world projects.

Looking forward to an enriching journey ahead.

CSE at IIT Bombay

Delegate

March 2025 - March 2025 (1 month)

Mumbai, Maharashtra, India

Selected as a participant for RISC 2025, organized by the Department of Computer Science at IIT Bombay.

Robotics Club, NIT Warangal

Executive

February 2023 - January 2025 (2 years)

Warangal

Indian Oil Corporation Limited (Iocl)

Internship Trainee

May 2024 - June 2024 (2 months)

Mathura, Uttar Pradesh, India

Gained knowledge about the unit processes including AVU, VBU, FCCU and CCRU units which help in manufacturing different types of petroleum products from raw crude oil.

e-Yantra, IIT Bombay

Lead Member

September 2023 - December 2023 (4 months)

Mumbai, Maharashtra, India

Robotics Competition (eYRC) hosted by e-Yantra, IIT Bombay.

Lead a team of 4 and collaboratively worked on "Cosmo Logistic" theme. We have used tools like OpenCV, Nav2, SLAM, Moveit, AMCL & EKF etc. in this competition.

Intrainz

Project Intern

July 2023 - September 2023 (3 months)

Warangal, Telangana, India

Completed an internship in the domain of Artificial Intelligence where I've made a project on "Spam News Detection" and "K-means clustering". In this I got to know about its applications, advantages, limitations etc., which will help me in effectively using in data analysis and machine learning projects.

Education

National Institute of Technology Warangal

Undergraduate , Chemical Engineering · (November 2022)

ALLEN CAREER INSTITUTE

· (September 2021 - August 2022)

FIITJEE

2nd year, Mathematics and Science · (June 2019 - July 2021)

Don Bosco Public School

High school · (May 2017 - March 2019)
